

**Job Title: Project Nurse and Midwives.**

**Organization: Smart African Village Development Consortium. (SADO)**

**Location: Smart African Development Consortium P. O. Box:800334**

**Ntinda Plot 1191, Masembe Road**

**Background:**

**Smart African Village Development Consortium** is seeking qualified and experienced persons for this position. The organization is committed to reducing the burden of Non-Communicable Diseases (NCDs) in Busoga Region, and is seeking a Technical Officer - Project Medical Officer to support its NCD control efforts.

**Purpose:**

The Project Nurse will provide nursing care and support to individuals and families affected by NCDs, and will work to strengthen community-based systems and structures to prevent and control NCDs.

**Responsibilities:**

1. Provide nursing care and support: Provide nursing care and support to individuals and families affected by NCDs, including health education, counseling, and referrals to health and social services.
2. Conduct health assessments: Conduct health assessments to identify individuals and families at risk of NCDs.
3. Develop and implement care plans: Develop and implement care plans to support individuals and families affected by NCDs.
4. Provide health education: Provide health education to individuals and families on NCD prevention and management.

5. Support community-based initiatives: Support community-based initiatives to prevent and control NCDs, including working with community health workers and community-based organizations.
6. Collaborate with healthcare providers: Collaborate with healthcare providers to ensure that individuals and families affected by NCDs receive comprehensive care.

**Deliverables:**

1. Nursing care and support plans: Develop plans to provide nursing care and support to individuals and families affected by NCDs.
2. Health assessments: Conduct health assessments to identify individuals and families at risk of NCDs.
3. Care plans: Develop and implement care plans to support individuals and families affected by NCDs.
4. Health education materials: Develop health education materials to support individuals and families affected by NCDs.
5. Community-based initiatives: Support community-based initiatives to prevent and control NCDs.

**Requirements:**

1. Diploma in nursing, Bachelor's degree in nursing (BScN) or equivalent.
2. Experience: At least 3 years of experience in controlling NCDs, preferably in a clinical or public health setting.
3. Technical expertise: Technical expertise in NCD control, including knowledge of NCD risk factors, prevention and control strategies, and program management.
4. Communication skills: Excellent communication skills, including written and verbal communication.
5. Teamwork: Ability to work effectively in a team environment.
